

Plant "Imagination"

It is the time of year when we look at plant catalogues and dream of those soft summer days in the garden and "imagine" what a new plant will look like in our garden. This month's featured plant is the Astilbe, '[Color Flash](#)' and '[Color Flash Lime](#)'. The Astilbe is a very hardy plant that the deer seem to leave alone and requires very little care. The Color Flash series has exceptional leaves that change color during the season. It can be a nice color accent in your garden. Can you imagine it next to your Hosta's and BleedingHeart?
